Sub: Regarding High end Radiological diagnostic Package

High end Radiological diagnostic (CT,MRI,Imaging including Nuclear imaging) Package can only be clubbed with a medical package. Rupees 5,000/- per annum is the package amount meant for the entire family and hence can not be utilized one time and for one beneficiary alone. While processing this package, a pop-up has started appearing in TMS which states: "Rs 5000 is the upper limit. Can be booked at a lower rate also. In fact the SHA should examine this package and confirm whether the package has been booked at the usual market rate. Can be booked for a pt. already admitted under any medical package."

Hence it is imperative that CPD and Medical Auditors adjudicate the claim amount according to the investigation performed. CPD and Medical Auditors should bear the following points in mind while adjudicating such claims:

- If a High end Radiological Investigation is booked by an EHCP under ABPMJAY, the rates of King George's Medical University shall henceforth be applicable as a reference while adjudicating claim amount. For example, if an EHCP wants to perform a Non-Contrast (Plain) CT scan of the Head, they may block aforementioned package in the TMS, but amount shall be paid according to the KGMU rate for NCCT Head i.e. Rs 500/-.

- Any incentive the hospital is entitled to (in lieu of being NABH accredited/teaching institution/aspirational district, etc.) may then be added to the final amount while approving the claim.
- If KGMU rates are not available for certain investigations which is a rare possibility, then rates of CGHS may be taken as reference rates for the same.
- In case KGMU/CGHS rate is equal to or exceeds the limit of Rs 5,000/- for a particular investigation, the full amount of Rs 5,000/- may be approved in that particular case.
- It is important to note that this package can be availed only with a medical diagnosis and can not be utilized with surgical package.
- KGMU Rate list for Radio-diagnosis is being attached herewith for reference.
- All ISA PPDs will mention the amount at the time of pre-authorization approval so that EHCP is apprised of the same.
- All ISAs are advised to inform their respective EHCPs about methodology for claiming this package.
